

What If I Have An Old Shower?

The good news is that Vitroglaze can also be applied to existing glass. In many instances, glass can be restored to look like new, then Vitroglaze can be applied to keep it looking that way!

On Site Service

Our professional on-site service is reliable, surprisingly affordable, safe and effective. Our staff are fully trained to make the process quick, hassle-free and with minimal interruption.

The Vitroglaze Warranty

This specialised home service is backed by a lifetime warranty* on new glass.

NEW GLASS
APPLICATIONS!**

Vitroglaze, for all your glass surfaces:

- » Shower Doors
- » Tiles and Grout
- » Splash Backs
- » Skylights and Conservatories
- » Granite and Marble Bench Tops

**CLEANING TIME
REDUCED BY
UP TO 90%**

Why Does Glass Need An Extra Coating?

The seemingly smooth surface of glass actually consists of microscopic ridges and valleys and is considered porous.

Some shower cleaners, along with contaminants such as soap scum, body fat deposits, lime scale, hard water deposits and all manner of other grime, makes the surface look dull.

Vitroglaze acts as a barrier for your glass and 'smooths' its surface, inhibiting the growth of these contaminants and protecting your glass against harsh cleaners that can corrode and pit.

How Does Vitroglaze Work?

Vitroglaze works in a similar way to non-stick cookware by filling the microscopic ridges and valleys of your glass surface.

A single Vitroglaze treatment makes your glass easier to clean and will keep it looking new without the need of harsh chemical cleaners

In fact, one permanent Vitroglaze treatment will reduce your cleaning time by up to 90% saving you time and money - no need to buy all those nasty cleaners that claim to clean your glass but actually may cause more damage!

**PROTECT NEW
GLASS BEFORE
THE DAMAGE
OCCURS**

**ONE-OFF
AFFORDABLE
APPLICATION**
